

When you consider the phasing of the proposed urban growth areas for development, what characteristics used in concept do you feel are most important in regards to parks and open space?

**Overall tally**

	1	2	3	4	5	6	7	8	9
Environment/wildlife corridors	3	5	4	2					
Water recharge areas	5		3	1	2	1			
Water resources (streams, wetlands, springs)	4	6	3		1				
Hydric Soils			1	1	1	5	2	1	
Soil productivity		1			4	1	1	3	1
Wooded areas		1	1	8	1	3			
Historical and cultural features			1		1		7		2
Protecting heritage/significant trees		1	1	1		1	1	7	
Public ownership	1								
Aesthetics & views	1								
Areas where non-motorized recreation can occur				1					
Different types of area needed - not all similar					1				

**Of those that marked this issue x% marked 1, 2, 3, etc**

	1	2	3	4	5	6	7	8	9
Environment/wildlife corridors	21%	36%	29%	14%					
Water recharge areas	42%		25%	8%	17%	8%			
Water resources (streams, wetlands, springs)	29%	43%	21%		7%				
Hydric Soils			9%	9%	9%	45%	18%	9%	
Soil productivity		9%			36%	9%	9%	27%	9%
Wooded areas		7%	7%	57%	7%	21%			
Historical and cultural features			9%		9%		64%		18%
Protecting heritage/significant trees		8%	8%	8%		8%	8%	58%	
Public ownership	100%								
Aesthetics & views	100%								
Areas where non-motorized recreation can occur				100%					
Different types of area needed - not all similar					100%				

**Of the 14 that answered question 5, x% marked 1 for this issue**

	1	2	3	4	5	6	7	8	9
Environment/wildlife corridors	21%	36%	29%	14%					
Water recharge areas	36%		21%	7%	14%	7%			
Water resources (streams, wetlands, springs)	29%	43%	21%		7%				
Hydric Soils			7%	7%	7%	36%	14%	7%	
Soil productivity		7%			29%	7%	7%	21%	7%
Wooded areas		7%	7%	57%	7%	21%			
Historical and cultural features			7%		7%		50%		14%
Protecting heritage/significant trees		7%	7%	7%		7%	7%	50%	
Public ownership	7%								
Aesthetics & views	7%								
Areas where non-motorized recreation can occur				7%					
Different types of area needed - not all similar					7%
