

# McGaw Park

## Formal Walk

The final option places a formal walk that organizes and becomes the artery serving the various park amenities. Using a sculpture garden at its west terminus in the new addition area, then a new shelter with restrooms, the walk (in an east-west orientation) proceeds through the existing park to Johnson Park will terminate at the Nature Center. Softball, existing shelter, volleyball and many other facilities are organized and accessed from the walk. While walking west to east you will move from a more urban feel (represented by the Sculpture Garden and Great Lawn) and move to a nature realm represented by Johnson Park, its oak trees and the nature center. Some alterations to the existing east parking lot to accommodate this walk will be required.
