Surveyor's Certificate:

I, Daniel V. Birrenkott, herby certify that this survey is in full compliance with Chapter 236.34 of Wisconsin Statutes. I also certify that by the direction of the owners listed hereon, I have surveyed and mapped the lands described hereon and that the map is a correct representation of all the exterior boundaries of the land surveyed and the division of that land, in accordance with the information provided.

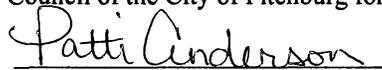

Daniel V. Birrenkott, Professional Land Surveyor No. S-1531 2-13-2019

Description:

Part of the Northwest ¼ of the Southeast ¼ and the Southwest ¼ of the Southeast ¼ and the Southeast ¼ of the Southeast ¼, Section 22, T6N, R9E, City of Fitchburg, Dane County Wisconsin. More fully described as follows. Beginning at the South ¼ Corner of Section 22; thence N00°58'01"E along the West line of the Southeast ¼ of Section 22, 2686.86 feet; thence N88°43'09"E along the North line of the Northwest ¼ of the Southeast ¼ of Section 22 also known as the centerline of Whalen Road, 1,325.99 feet; thence S00°49'33"W along East line of the Northwest ¼ of the Southeast ¼ also known as the centerline of Caine Road, 1,344.72 feet; thence N88°46'47"E along the North line of the Southeast ¼ of the Southeast ¼ of said Section 22, 940.63 feet; thence S00°41'06"W, 1,345.60 feet; thence S88°50'25"W along the South line of the Southeast ¼ of Section 22, 2,276.41 feet to the point of beginning. Containing 4,837,552 square feet or 111.0 acres.

City of Fitchburg Approval Certificate

This Certified Survey Map, including any right of way dedication, or other dedications herein, is hereby approved by the Common Council of the City of Fitchburg for recording this 8th day of January 2019.

Patti Anderson
City Clerk, City of Fitchburg

Notes:

- Utility Easement: No poles or buried cables are to be placed on any lot line or corner. The disturbance of a survey stake by anyone is in violation of Section 236.32 of Wisconsin Statutes.
- Wetlands if present have not been delineated.
- This survey is subject to any and all easements and agreements both recorded and unrecorded.
- This survey shows above-ground improvements only. No guarantee is made for below-ground structures.
- As owner of Lots 1 and 2 of this Certified Survey Map, I hereby stipulate that I and my heirs or assigns will not object to any of the legally permitted uses that occur on the adjoining property

Right-To-Farm Notice

This statement concerns the property in the City of Fitchburg Dane County, described as as Lot 2 of Certified Survey Map 15046, recorded in Vol. 106, on Pages 173-176. Parcel No. 225/0609-224-8890-2. This statement is a disclosure of the condition of the above described property in compliance with approvals granted on January 8, 2019 (R-11-19) indemnifying all neighboring farm operations the right to farm.

The City of Fitchburg permits operation of properly conducted agricultural operations within the City. This property Parcel # 225/0609-224-8890-2 is located near agricultural lands or operations or included within an area zoned for agricultural purposes and may be subject to inconveniences or discomfort arising from such operations. Such discomfort or inconveniences may include but are not limited to: odors, noise, dust, flies, and slow moving vehicles. One or more of the inconveniences may occur as a result of any agricultural operation which is in conformance with existing laws and regulations and accepted customs and standards. By owning this property, you should be prepared to accept such inconveniences or discomfort as a normal and necessary aspect of living in the rural portion of the City with a strong rural character and an active agricultural sector. Sale of this property does not preclude future owners from this statement.

SECTION: 22, TOWN: 06N, RANGE: 09 E/W

AND/OR LOT: 2 BLOCK _____

SUBDIVISION: CSM 15046

CHAPTER 145.135 (2) WISCONSIN STATUTES

The purpose of the sanitary permit is to allow installation of the private sewage system described in the permit.

The approval of the sanitary permit is based on regulations in force on the date of approval.

The sanitary permit is valid and may be renewed for a specified period.

Changed regulations will not impair the validity of a sanitary permit.

Renewal of the sanitary permit will be based on regulations in force at the time renewal is sought, and that changed regulations may impede renewal.

History: 1977 c. 168; 1979 c. 34,221; 1981 c. 314

Note: If you wish to renew the permit, or transfer ownership of the permit, please contact the county authority.

Owner Name: Patrick C Stern

Dear Patrick C Stern

Sanitary Permit #13-2020-00128 was conditionally issued in your interest to your system installer on 06/01/2020. This permit is valid for two years (until 06/01/2022) and may be renewed or transferred as indicated on the face of the permit.

A condition of the issuance of this permit is that you, as owner of this private septic system, ensure that appropriate system inspection and maintenance is performed as required by s145.245, Wisconsin Statutes and by Dane County Code Chapter 46.11(5). The appropriate inspection and maintenance for your system is described in the private septic system management plan provided by your installer. The licensed professional that you hire to perform this service will document their results on forms provided by Public Health Madison and Dane County. These forms must be submitted to this Department for your system to be in compliance with State and County laws. Fees associated with this program will be assessed annually on the property tax bill. Currently this fee is \$8.67 per year.

You will be notified by the Environmental Health Section approximately three months before the servicing is due. Failure of notification will not relieve you of the obligation to have your system serviced. Failure to either have the private sewage system serviced or failure to report same to the Environmental Health Section are prohibited practices. All prohibited practices are subject to fines or forfeitures as specified by County Ordinance.

All heirs or assigns of this property shall be notified of these requirements.

If you have any questions, please feel free to contact me at (608) 242-6515 between 7:45 AM and 4:30 PM Monday through Friday.

Sincerely,

John Hausbeck
Environmental Health Services Supervisor

Maintenance of the GF10 Filter

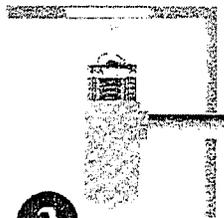

A time frame in which septic tanks are serviced is set by state and local codes. Although they may be different, most regulatory agencies suggest two to five years. We recommend the GF10 filter be cleaned when the septic tank is normally cleaned and pumped, or as needed.

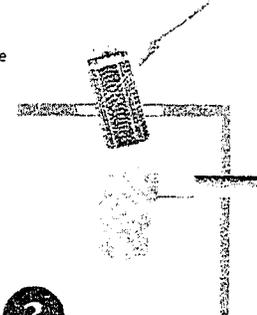

WARNING: If the liquid level in the tank is above the top of the filter, pump the tank prior to removing the filter cartridge.

1 CAUTION: USE RUBBER GLOVES WHEN HANDLING FILTERS!

Step 1: Remove the septic tank cover and pump the tank if necessary to prevent any solids from escaping to the field when the filter is removed.

Step 2: Pull the filter handle and slide the filter out of the case.

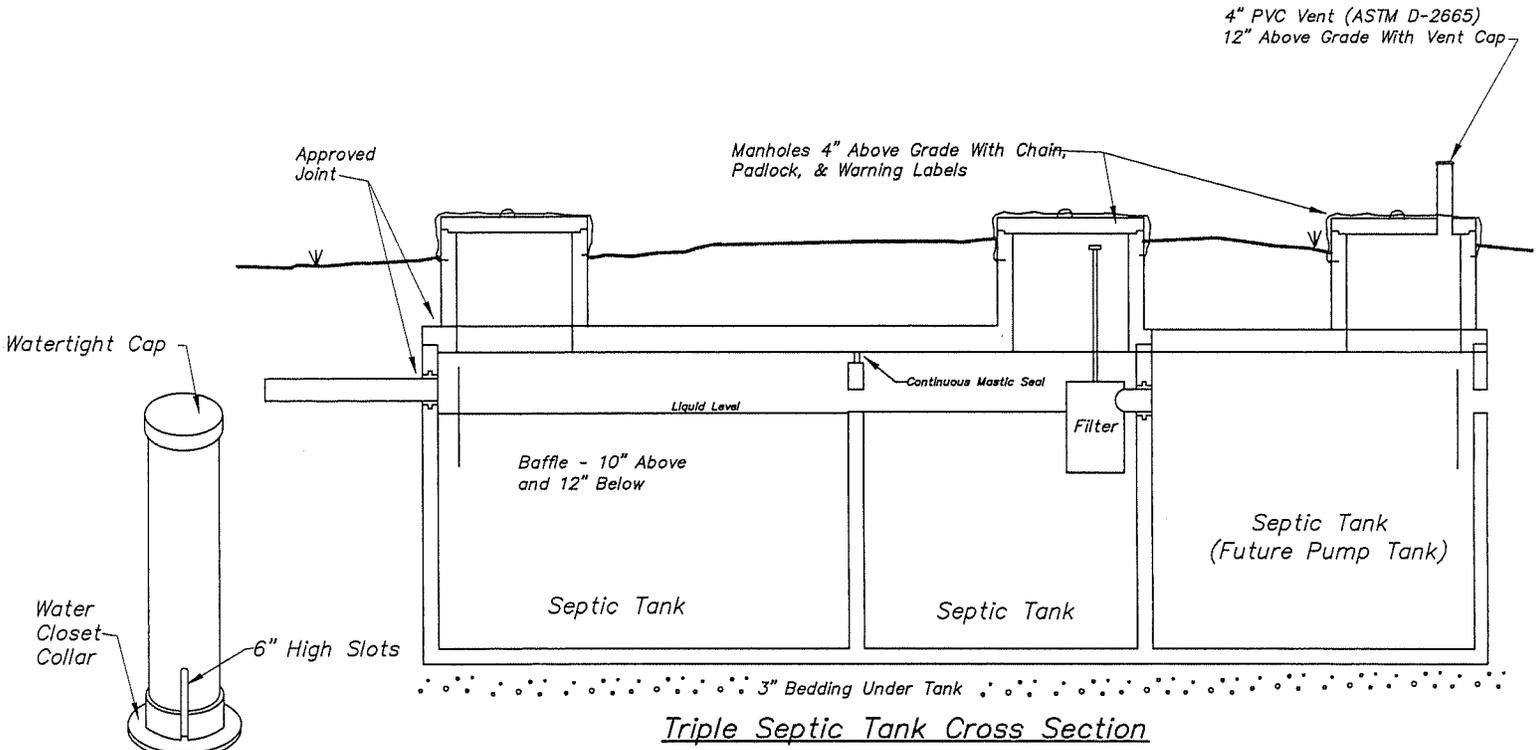

Step 3: While holding the filter cartridge over the access opening of the tank, rinse the cartridge off with fresh water. Take care to make sure all solid material falls back into the tank.

Step 4: Insert the cartridge back into the case making sure that it is properly aligned and completely inserted into the case.

MAINTENANCE INSTRUCTIONS

Inspections of tanks and dispersal cells shall be made by an individual carrying one of the following licenses or certifications: Master Plumber, Master Plumber Restricted Sewer, POWTS Inspector, POWTS Maintainer, Septage Servicing Operator (pumper). Tank inspections must include a visual inspection of the tank(s) to identify any missing or broken hardware, identify any cracks or leaks, measure the volume of combined sludge and scum and a check for any back up or ponding of effluent on the ground surface. If the volume of sludge and scum is less than one-third (1/3) of the liquid volume of the tank, the tank does not need to be pumped and identifying cracks in floor or walls of the tank may not be possible at that time. The dispersal cell(s) shall be visually inspected to check the effluent levels in the observation pipes and to check for any ponding of effluent on the ground surface. The ponding of effluent on the ground surface may indicate a failing condition and requires the immediate notification of the local regulatory authority.

When the combined accumulation of sludge and scum in any treatment tank equals one-third (1/3) or more of the tank volume, the entire contents of the tank shall be removed by a Septage Servicing Operator and disposed of in accordance with chapter NR 113, Wisconsin Administrative Code.

All other services, including but not limited to the servicing of effluent filters, mechanical or pressurized components, pretreatment units, and any servicing at intervals of ≤12 months, shall be performed by a certified POWTS Maintainer.

A service report shall be provided to the Environmental Health and Labs Division of Public Health Madison and Dane County within 30 days of completion of any service event.

START UP AND OPERATION

For new construction, prior to use of the POWTS, check treatment tank(s) for the presence of painting products, solvents or other chemicals or sediment that may impede the treatment process and/or damage the soil absorption cell(s). If high amounts of these materials are detected in the tanks, have the contents of the tank(s) removed by a septage servicing operator prior to use.

System start up shall not occur when soil conditions are frozen at the infiltrative surface.

During extended power outages pump tanks may fill above normal high water levels. When power is restored the excess wastewater will be discharged to the dispersal cell(s) in one large dose and may overload them resulting in the backup or surface discharge of effluent. To avoid this situation have the contents of the pump tank removed by a Septage Servicing Operator prior to restoring power to the effluent pump or contact a Plumber or POWTS Maintainer to assist in manually operating the pump controls to restore normal levels within the pump tank.

Do not drive or park vehicles over tanks and dispersal cells. Do not drive or park over, or otherwise disturb or compact, the area within 15 feet down slope of any mound or at-grade soil absorption area.

Reduction or elimination of the following from the wastewater stream may improve the performance and prolong the life of the POWTS: antibiotics, baby wipes, cigarette butts, condoms, cotton swabs, degreasers, dental floss, diapers, disinfectants, fat, foundation drain (sump pump) discharge, fruit and vegetable peelings, gasoline, greases, herbicides, meat scraps, medications, oils, painting products, pesticides, sanitary napkins, tampons, and water softener brine.

ABANDONMENT

When the POWTS fails and/or is permanently taken out of service the following steps shall be taken to insure that the system is properly and safely abandoned in compliance with s. SPS383.33, Wisconsin Administrative Code:

- All piping to tanks, pits and other soil absorption systems shall be disconnected and the abandoned pipe openings sealed.
- The contents of all tanks and pits shall be removed and properly disposed of by a Septage Servicing Operator (pumper).
- After pumping, all tanks and pits shall be excavated and removed or their covers removed and the void space filled with soil, gravel or another inert solid material.

CONTINGENCY PLAN

If the POWTS fails and cannot be repaired the following measures have been, or must be taken, to provide a code compliant replacement system:

- A suitable replacement area has been evaluated and may be utilized for the location of a replacement soil absorption system. The replacement area should be protected from disturbance and compaction and should not be infringed upon by required setbacks from existing and proposed structure, lot lines and wells. Failure to protect the replacement area will result in the need for a new soil and site evaluation to establish a suitable replacement area. Replacement systems must comply with the rules in effect at the time of their permit issuance.
- A suitable replacement area is not available due to setback and/or soil limitations. If the soil absorption system cannot be rehabilitated and barring advances in POWTS technology, a holding tank may be installed as a last resort.
- The site has not been evaluated to identify a suitable replacement area. Upon failure of the POWTS a soil and site evaluation must be performed to locate a suitable replacement area. If no replacement area is available a holding tank may be installed as a last resort to replace the failed POWTS.
- Mound and at-grade soil absorption systems may be reconstructed in place following removal of the biomat at the infiltrative surface. Reconstructions of such systems must comply with the rules in effect at that time.

WARNING: TREATMENT TANKS AND HOLDING TANKS MAY CONTAIN POISONOUS GASSES AND LACK SUFFICIENT OXYGEN TO SUPPORT LIFE. NEVER ENTER A TREATMENT TANK OR HOLDING TANK UNDER ANY CIRCUMSTANCE. DEATH MAY RESULT. ESCAPE OR RESCUE FROM THE INTERIOR OF A TANK IS VERY DIFFICULT.
